ELIJAH WALKER

elijahjames.walker@gmail.com | Boise, ID
github.com/ennels | linkedin.com/in/elijah-the-walker

PROFILE

Passionate AI & Cloud Computing student with hands-on semiconductor fab experience from a Micron process control internship. Builds data and AI tools in Python, from machine learning classifiers to LLM-powered apps.

SKILLS

AI / ML
- Machine learning (PyTorch)
- LLM apps & RAG
- AI agents & automation
- AI-assisted development

Data
- Python (Pandas, NumPy)
- SQL
- Data visualization (Tableau)
- Statistical analysis

Manufacturing
- SPC
- Metrology data review
- Cleanroom protocol
- Tool troubleshooting

EDUCATION

Associate of Applied Science: Artificial Intelligence & Cloud Computing
College of Western Idaho | GPA: 4.0 | Expected Spring 2027 | Planned: B.S., Boise State University (Fall 2027)

Coursework: Machine learning, agentic engineering, computer vision, cloud computing, data visualization
Leadership: Vice President of Leadership, Phi Theta Kappa Honor Society; Event Coordinator, AI Club

EXPERIENCE

Process Control Technician Intern
Micron Technology, Manassas, VA | Jun – Aug 2026

- Reviewed metrology data and analyzed SPC charts; supported tool troubleshooting and engineering escalations.
- Learned CVD process and chemistry fundamentals and cleanroom protocol; contributed to shift passdowns.

Digital Media Manager; Support Staff
Quaker Hill Camp & Conference Center, McCall, ID | Jun 2016 – May 2026

- Conducted IT services, managed digital assets and media marketing, trained support staff, and coordinated teams.

PROJECTS

Quorum: Endgame Employee Management
Tauri, React, FastAPI, SQLAlchemy, Claude Vision API

- Built an AI-assisted desktop scheduling app for a conference center with a React/Tauri UI and FastAPI back end.
- Integrated QuickBooks (OAuth 2.0) and Cognito Forms REST APIs; used an LLM vision model to read PDF forms.

Breast Cancer Tumor Classification (SVM)
Python, scikit-learn, NumPy, Matplotlib

- Trained linear and RBF-kernel SVMs to classify Wisconsin breast cancer tumors as malignant or benign.
- Compared kernel accuracy (95.6% linear, 96.5% RBF) with 0.95 malignant recall; plotted confusion matrices.

Black Friday Shopping Trends
Google Sheets, SurveyMonkey

- Co-designed and fielded a 10-question survey (n=39) on the 2024–25 shift from in-store to online shopping.
- Ran χ^2 goodness-of-fit tests (p=0.72, no significant change); found 49% of respondents less likely to shop in person.

RAG + MCP Server
Python, Model Context Protocol, ChromaDB, embeddings

- Built an MCP server with web-search, PDF-ingestion, and RAG tools backed by ChromaDB vector storage.
